esuits² SSO-LD Client

Single Sign on Client for AVAYA Desk Phone

Registration and control your phone through your computer's status.

Using this technology enables a new experience when it comes to free setting concepts and phone registration. While login on to his computer the personal phone of the employee gets automatically registered. So the employee has instance access to his phone wherever he is located.

While being active, esuits² SSO-LD monitors the status of the computer in the background. Once the employee, for example, locks his computer, the associated telephone gets also locked.

esuits² SSO Client Key Features

- Simultaneous log on and off of the phone and computer
- Behaviour of phone by computers log off centrally adjustable
